COLOP®

MARKING SOLUTIONS

The Spirit of Innovation

About us

The Spirit of Innovation

Global Player. COLOP is one of the world's leading manufacturers of modern stamp and marking devices. With more than 500 employees and numerous subsidiaries worldwide, COLOP exports to more than 130 countries with an export rate higher than 98 %. Continuous growth is firmly rooted in COLOP's corporate philosophy, which ensures that the globally increasing demand for high-quality European stamp products can continue to be met in the future.
It was for this reason that a major expansion of the production capacity was carried out in the last few years at both the parent plant in Wels, Austria, and at the company's second production site in the Czech Republic. COLOP operates in three business areas: in the standard stamps segment, in the digital marking area as well as in the field of arts and crafts.

Innovation & Design. Since it was founded some 40 years ago, COLOP has been committed to product innovation in the field of state-of-the-art marking devices, particularly stamps. In 2008, for instance, the company introduced 'Green Stamps' into the stamp world. These stamps are made predominantly from recycled or renewable raw materials. Stamps with antibacterial protection are another of the company's significant innovations. With the Printer stamp line, the personalisation of stamps has become a trend. In 2019 COLOP introduced the world's first electronic-digital stamp and marking device for mobile printing of its kind – the COLOP e-mark®.

Marking Solutions. The range of products comprises a large selection of stamp solutions for different applications, including office and pocket stamps, text and date stamps, rectangular and round stamps. COLOP also supplies all the products and systems necessary to ensure a high-quality stamp imprint. The range of services offered by COLOP is rounded off by e-business solutions for the creation of text plates and the sale of stamp products online, as well as software tools for the personalisation of ImageCards™.

Quality & environmental management. COLOP's environmental management system has been ISO 14001 certified for many years, which ensures that all processes have been optimised from an ecological perspective. The company has however also had the conviction to make a voluntary, above-average contribution to environmental issues, going above and beyond the strict EU and national regulations. COLOP has been ISO 9001 certified since 2001. This certification forms the basis for a continual improvement process as part of the company's excellent internal quality management system.
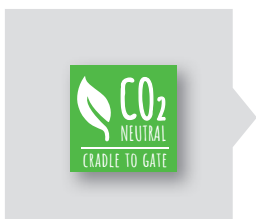

CO_2 neutral. As early as during product development, attention is paid to resource conservation and the use of sustainable materials. The use of recycled plastics is constantly optimised and increased, and energy and raw materials are used as efficiently as possible. The in-house photo-voltaic system produces a considerable part of the electricity required at the Wels site. The significantly reduced but unavoidable CO_2 emissions of products - manufactured at one of the two production sites in Wels, Austria or Borovany, Czech Republic - are offset by investments in climate protection projects (Gold Standard projects). This means that more than 90 % of all products in the COLOP stamp range can be described as climate neutral.

High tech production. A modern and efficient production process is of great importance to COLOP, paying special attention to the energy resources required. Fully automated production and manufacturing of key product lines, ongoing modernisation and upgrading of machinery and constant process optimisations all ensure high quality products and an energy-efficient manufacturing process.

EOS Line

Especially for you

The EOS Line is a modern and ergonomically designed flash stamp for brilliant and sharp imprints.
Quick to manufacture and available „while you wait" if required.
The attractive black and white handles offer the perfect picture frame for your personal design.
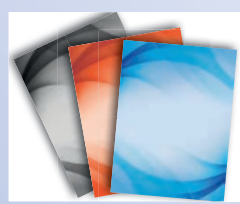

Included are three
appealing ImageCard™
designs to choose from

Cover for protection
and transportation

X-Large formats
for oversize stamping

121 mm

Easy and clean
re-inking

80%

recycling

Black EOS Standard and
XL stamps are made of
minimum 80% recycled
plastics

EOS ImageCard™ Designer
With the COLOP
software you can
easily personalise
the look of your
EOS stamp.

EOS Motivational Stamps

Motivate with an attractive stamp imprint

High quality stamps with positive, motivating messages - designed for target groups such as education or loyalty programs.

Preinked – Stamp is ready to use and requires no extra ink pad

Re-inkable – If imprint fades - pull off the handle and re-ink the stamp for further imprints

Round image sticker – Shows the imprint on the handle and helps to choose the right stamp

High quality inks – for brilliant and jolly imprints

Easy handling – A simple but ergonomical handle guarantees effortless stamping

Practical storage – The enclosed plastic box is perfect to keep the stamp ready and clean when not used

Motivational Stamp Maker
Create your EOS production template quickly and easily with the COLOP online tool „Motivational Stamp Maker". Many different designs are available. Each text can be modified to your language.

Flash Machine

Optimally adjusted for the production of EOS stamps

The compact COLOP FS-800 and FS-1200T are simple to use. The machines are optimised for the whole EOS product range and the system guarantees excellent results every time.

The robust shutter mechanism distributes the pressure evenly on the flash text plate

The flash process starts automatically by closing the lid

Magnetic distance plates allow a fast switch over of the particular EOS systems

EOS Typesetting Tool

Typesetting with a few clicks

The EOS Typesetting Tool contains everything the user will need to create textplates in minutes. It offers templates as well as the ability to upload photographs.

Make stamps
with your photo

Includes templates
for all EOS sizes

Download the software here:

**eostst.colop.com**

1.

CHOOSE SIZE AND TEMPLATE

Choose the desired EOS size and start either with a template or with a blank text plate.

2.
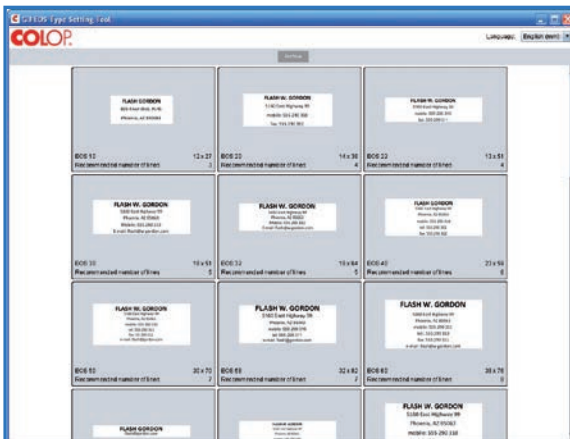

TYPESETTING

Enter the text and use the formatting controls to change the text style.

3.

ADD IMAGES OR EVEN PHOTOS

Choose images from the Clipart Collection or upload your own photo. It will be processed by a half-tone-filter to use it for a stamp.

4.

PREVIEW AND PRINT

Click on "view" to see the PDF preview and make sure that following settings are correct: Paper size DIN A4 (210 x 297 mm – also when using A6 vellum), no page scaling and no "auto-rotate and auto-center mode".
